Mobile bar services for corporate and private events

HOW WE WORK

Option 1

The customer orders exact quantities as per the price list. The rolling green will arrive at the location and serve the exact amount ordered. The rolling green therefore does not carry extra stock. The rolling green does not refund any open kegs/bottles or any packs. A keg cannot be halved. The service fee includes all condiments/ ice and packaging. The service fee is dependant on times/location/set up type and special requests.

Option 2

The customer agrees to our invoiced on consumption agreement whereby the customer recommends quantities and stocklist. The rolling green will therefore arrive with this recommended stocklist and quantities. The rolling green will request a 40% deposit on the total value of the stock requested. Once the event has finished a tally will indicate the consumption and an invoice therefore be furnished based on this amount. Any opened kegs/bottles or packs are counted as consumed. The customer will be able to take any open bottles and packs after the event. The service fee is dependant on times/location/set up type and special requests. This service fee includes all condiments/ ice and packaging.
